<p>Investment Strategy</p>	<p>The Scheme follows a passive investment strategy and invests in stocks in a proportion that is to the weightages of these stocks in the index. This would be done by investing in all the stocks comprising the Nifty India Manufacturing Index in approximately the same weightage that they represent in Nifty India Manufacturing Index. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the indices.</p> <p>The investment objective of the scheme is to achieve return equivalent to Nifty India Manufacturing Index by investing in stocks of companies comprising Nifty India Manufacturing Index, subject to tracking error.</p> <p>The Scheme endeavors to invest in stocks in proportion to the weightages of these stocks in the Nifty India Manufacturing. The fund will, in general invest a significant part of its corpus in equities; the surplus amount of the fund not exceeding 5% shall be invested in Cash/Tri-Party Repo, Repo in corporate debt securities & Money Market instruments.</p> <p>The performance of the Scheme may not be commensurate with the performance of the respective benchmark of the Schemes on any given day or over any given period. Such variations are commonly referred to as the tracking error. The Scheme intends to maintain a low tracking error by actively managing the portfolio in line with the index.</p> <p>However there is no assurance that all such buying and selling activities would necessarily result in benefit for the Fund</p> <p>A small portion of the net assets will be held as cash or will be invested in debt and money market instruments permitted by SEBI/RBI including TREPS or in alternative investment for the TREPS as may be provided by the RBI, subject to prior approval, if any, to meet the liquidity requirements under the Scheme.</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Scheme specific Risk Factors are summarized below:</p> <p>Investments in equity and equity related instruments involve a degree of risk, both company specific and market risks and thus investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.</p> <p>Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of</p>

	<p>Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as price volatility, volumes traded, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected.</p> <p>The scheme also carries risks associated with investing in debt and money market securities, derivatives. Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, Segregated Portfolio etc.</p> <p>Please refer Scheme Information Document for details.</p>
Risk Control	<p>The risk control process involves reducing risks through portfolio diversification. This diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. There would be regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Index.</p> <p>Nifty India Manufacturing Index fund being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions.</p>
